

Terminal & Cloud PDF Compilation Master Prompt & Reference Guide

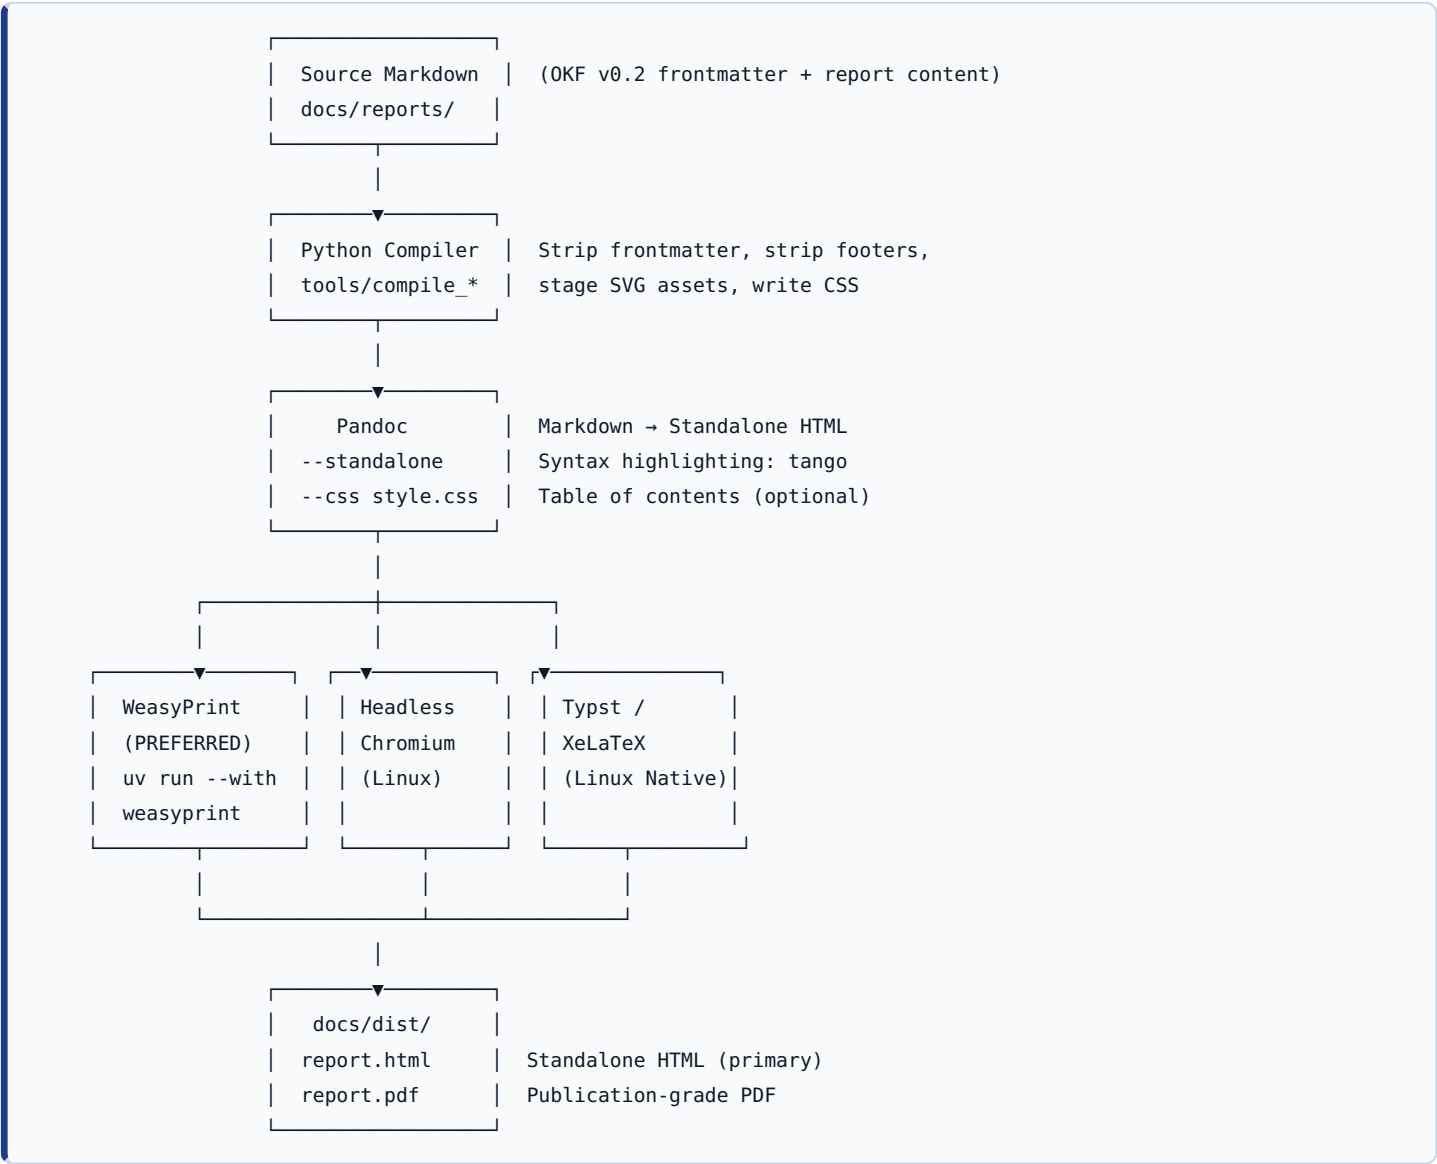

Classification: DSOM Rule 11 & Rule 11.16 — Technical Book Design & Linux-Native PDF Compilation
Author: Harisfazillah Jamel (LinuxMalaysia)
Date: 30 September 2026
Purpose: Self-contained prompt to reproduce publication-grade PDFs from Markdown using the full Linux toolchain

Rule 11.16: Linux-Native PDF Compilation Mandate (WeasyPrint / Typst Engine)

When compiling technical documentation suites, forensic audit reports, or executive handbooks into publication-grade PDFs in Linux and WSL2 environments:

- 1. Zero Windows Host Dependency:**
 - The AI and compilation pipelines are strictly prohibited from depending on Windows host browser binaries (`chrome.exe` , `msedge.exe`) or Windows interop subprocesses (`cmd.exe /c start /wait` , `powershell.exe`) from within Linux/WSL2.
 - Eliminates Windows profile lockouts, headless drawing stalls, interop command timeouts (code 124), and cross-filesystem path translation overhead.
- 2. Linux-Native Headless PDF Engines (WeasyPrint First):**
 - The preferred, primary PDF compilation engine in Linux is native **WeasyPrint** executed via `uv` (`uv run --with weasyprint weasyprint <input.html> <output.pdf>`) or native headless Linux tools (`typst` , `xelatex`).
 - The script must supply print-optimized CSS enforcing:
 - Pure white background (`#FFFFFF !important`).
 - Crisp, embedded standalone vector SVG diagrams (``).
 - Continuous multi-page table flow with repeated table headers (`thead { display: table-header-group; }` , `tr { page-break-inside: avoid; }`).
 - Standard A4 margins (`@page { size: A4 portrait; margin: 10mm 10mm 12mm 10mm; }`) and running footers (`Page X of Y`).
- 3. Deterministic Output & Disk Verification:**
 - The compiler script must synchronously assert that the output PDF exists on disk and has a non-zero byte size (`size > 10 KB`).
 - If visual inspection is needed, verify pages locally using native Linux tools (`pdftoppm -png -r 150 <output.pdf> build/page`) without touching Windows.

1. Toolchain Overview

Required Software (Linux / WSL2)

Tool	Install Command	Purpose
Pandoc	<code>sudo apt install pandoc</code>	Markdown → Standalone HTML conversion
uv	<code>curl -LsSf https://astral.sh/uv/install.sh sh</code>	Python package runner (no virtualenv needed)
WeasyPrint	<code>uv run --with weasyprint weasyprint</code>	HTML → PDF (CSS @page support, running headers/ footers)
Python 3.10+	Pre-installed on most Linux	Compiler script execution
Chromium (optional)	<code>sudo apt install chromium-browser</code>	Alternative headless PDF renderer

2. The Terminal & Cloud CSS Framework (Pure White Print Mode)

This is the **complete, production-tested CSS** used in all our reports:

```

/* =====
Terminal & Cloud Design Framework – Print-Optimized Pure White
DSOM Rule 11 & Rule 11.16 | Zero Ink Waste | A4 Portrait | 10mm Margins
===== */

/* — Page Layout & Running Footer — */
@page {
  size: A4 portrait;
  margin: 10mm 10mm 12mm 10mm;
  @bottom-right {
    content: "Page " counter(page) " of " counter(pages);
    font-family: 'Inter', sans-serif;
    font-size: 8pt;
    color: #64748B;
  }
  @bottom-left {
    content: "PRIVATE AND CONFIDENTIAL (P&C) | Compile by: Harisfazillah Jamel";
    font-family: 'Inter', sans-serif;
    font-size: 8pt;
    color: #64748B;
  }
}

/* — Body Typography — */
body {
  font-family: 'Inter', -apple-system, BlinkMacSystemFont, "Segoe UI",
    Roboto, Helvetica, Arial, sans-serif;
  font-size: 8.8pt;
  line-height: 1.5;
  color: #0F172A; /* Dark Slate for maximum legibility */
  background-color: #FFFFFF !important; /* Pure white – ZERO toner waste */
  margin: 0;
  padding: 0;
}

/* Hide Pandoc's auto-generated title block (we use custom covers) */
#title-block-header {
  display: none !important;
}

/* — Heading Hierarchy — */
h1 {
  font-size: 17pt;
  font-weight: 800;
  color: #0F172A;
  border-bottom: 2px solid #0284C7; /* Sky Blue accent */
  padding-bottom: 6px;
  margin-top: 0;
  margin-bottom: 12px;
  page-break-after: avoid;
}

h2 {
  font-size: 12pt;
  font-weight: 700;
  color: #1E3A8A; /* Linux Blue */
  border-bottom: 1px solid #E2E8F0;
  padding-bottom: 4px;
}

```

```

        margin-top: 18px;
        margin-bottom: 10px;
        page-break-after: avoid;
    }

.card-red    { border-left: 5px solid #DC2626; background: #F8FAFC; padding: 10px; margin: 8px 0; }
.card-purple { border-left: 5px solid #7C3AED; background: #F8FAFC; padding: 10px; margin: 8px 0; }

```

3. Checklist Before Every Compilation

- ☐ Source Markdown has NO raw `---` frontmatter (stripped by compiler)
- ☐ All SVG diagrams staged to both `build/` and `docs/dist/`
- ☐ CSS uses pure white `#FFFFFF` body background
- ☐ CSS uses light code containers `#F8FAFC` (NOT dark/black)
- ☐ Tables have `page-break-inside: auto` + `thead { display: table-header-group; }`
- ☐ No `<colgroup>` tags in HTML (strip them — they break table column widths)
- ☐ Running footer shows “Page X of Y” and report title
- ☐ Attribution: “Compile by: Harisfazillah Jamel”
- ☐ PDF file size > 10KB (assertion check)

Visual inspection: no blank pages, no orphaned headings, no clipped tables
